Dr. Masahisa Nakamura

Director of Center for Sustainability
and Environment
Shiga University, Japan

With a Guest Lecture:

"Integrated Lake Basin Management as
a Contributing Framework toward
meeting the Global Water
Management Challenges"

Thursday, 19 January 2012, at 12:30
PM – 1:30 PM in WC 130

A Leader in Sustainable Lake Management

Dr. Masahisa Nakamura is the Director of Center for Sustainability and Environment, by a special appointment, at Shiga University, Japan. He is also Chairman of the Scientific Committee of the International Lake Environment Committee. Formerly, he served as Director of the Lake Biwa Research Institute in Japan for more than ten years. Dr. Nakamura is an internationally known expert on integrated lake management and has conducted extensive research on the subject in countries of Asia, Africa and America. He has served as an expert adviser for various national and international agencies, including Japan International Cooperation Agency, Global Environment Facility, and the World Bank among others. Dr. Nakamura holds a Ph.D. from University of Illinois.
